

Mustang Technology Group Selected in Top 100 Places to Work 2009 in DFW and Dallas 100™ Fastest Growing Businesses

Allen, TX, Nov 9 – Mustang Technology Group announced today that the company has been selected in the **Top 100 Places to Work 2009** in the Dallas-Ft. Worth Metroplex by the *Dallas Morning News*. Mustang was selected as the 10th overall best place to work and 4th in the small business category. The awards were announced in the Sunday, November 8, issue of the *Morning News*. Selection to the Top 100 list was based on results of a survey sent to all employees of a company. The top companies excelled in six areas of evaluation: Direction, Execution, Career, Managers, Conditions, and Pay and Benefits.

“We’re thrilled to receive this recognition as a great place to work. Being in the top ten best places to work in the fourth largest metro area in the nation is quite an honor,” said Mustang President Kent Lowder. “The key to Mustang’s success is our outstanding workforce. Our people set us apart from our competitors.”

“Our engineers are excited about working with cutting edge technology and making a difference for our country’s warfighter,” said Jeanne Simmons, Director of Human Resources. “Our team members value Mustang’s family friendly environment and senior management’s honest and ethical approach to business. It does not get any better than working for a company like Mustang where you feel respected, valued, and trusted.”

Mustang was also selected as one of the **Dallas 100™ Fastest Growing Businesses** by the SMU Cox School of Business. Mustang was the 26th overall fastest growing company in the Dallas area. The awards were announced in the Friday, Nov 6, issue of *The Dallas Business Journal*. The award winners are chosen on increased growth in sales, giving weight to percentage of growth and absolute dollar growth in the three years preceding the event.

“We want to extend our gratitude to all our customers that have exhibited so much confidence in Mustang, our products and our technologies,” said Michael Stephens, Vice President of Technology. “Working closely with our customers is essential to developing the most effective solutions for the user.”

Mustang is one of five companies that were selected for both the Top 100 Places to Work and the Dallas 100™ Fastest Growing Businesses lists.

Mustang Technology Group is a privately held defense contractor in Allen, Texas. It is the mission of Mustang Technology Group to serve the users of our products and the people of Mustang. We accomplish this mission by developing and producing innovative and affordable radars and sensor systems for the Departments of Defense and Homeland Security.
